

Repositional Wall Graphics

Easy to apply. Re-use time & time again!

Ideal for use in store, within reception areas or at live events such as exhibitions and conferences. In addition to wall applications this material can also be applied to roller banners or exhibition displays to add variable or temporary information.

Product Specification

- 100 micron, matt white, PVC film
- Ideal for full colour graphics or images
- Best suited for indoor applications, however short term outdoor may be possible in dry conditions
- Dot adhesive enables easy application and helps to prevent air bubbles
- Slight surface texture due to dot adhesive
- Best applied to smooth or slightly curved surfaces
- Residue-free removable from various surfaces
- Lasts up to 2 years, depending on usage
- Available in sizes up to 2.5m x 1.37m

Please note that all specifications are given as reference as it is impossible to test every possible application. We are happy to offer free printed material samples and we recommend that our customers assess the material suitability themselves.

REPOSITIONAL WALL GRAPHICS

When to use this product (Checklist)

This innovative film is best suited to usage where:

- You require a quick and easy application
- You only require temporary graphics
- You need to change the location of the graphics
- You want the ability to easily remove the graphic at any point in the future
- You want to add changeable information to display equipment (roller banners & exhibition stands)
